- » I will monitor during class

Today's Agenda

- » Topic overview: *CSCW*
- » Discussion

Topic overview: CSCW

What is CSCW?

What is CSCW?

Definition: CSCW "combines the understanding of the way people work in groups with the enabling technologies of computer networking, and associated hardware, software, services and techniques."¹

What is groupware?

Definition: Groupware includes application software designed to help people working on a common task to attain their goals.²

¹Lojeski (2009). [Leading the virtual workforce: How great leaders transform organizations in the 21st century.](#)

²[Wikipedia](#)

CSCW = the group working process + the technology¹

¹Lojeski (2009). Leading the virtual workforce: How great leaders transform organizations in the 21st century.

What do you mean by group work processes?

1. *Individual human characteristics*, e.g., conversation patterns
2. *Organizational aspects*, e.g., structure and culture of the organization
3. *Group work design issues*, e.g., involvement in the work design process
4. *Group dynamics*, e.g., group decision making, collaboration¹

¹Lojeski (2009). Leading the virtual workforce: How great leaders transform organizations in the 21st century.

What do we mean by CSCW technology?

1. *Communication mechanisms*—enabling people to communicate, e.g., videoconferencing
2. *Shared work space facilities*—enabling people to view and work on the same electronic space, e.g., screen sharing
3. *Shared information facilities*—enabling people to view and work on a shared set of information, e.g., cloud-based document sharing
4. *Group activity support facilities*—augmenting group work processes, e.g., simultaneous document editing¹

¹Lojeski (2009). Leading the virtual workforce: How great leaders transform organizations in the 21st century.

Time/space Groupware Matrix³

	Synchronous	Asynchronous
Collocated	Face-to-face interactions Decision rooms, single display groupware, shared table, wall displays, roomware	Continuous task Team rooms, large public display, shift work groupware, project management
Remote	Remote interactions Video conferencing, instant messaging, chats/MUDs/virtual worlds, shared screens, multi-user editors	Communication + coordination Email, bulletin boards, blogs, asynchronous conferencing, group calendars, workflow, version control, wikis

³[YouTube](#)

Face-to-face interactions⁴

Right: group decision rooms (e.g., NASA Mission Control Center, Johnson Space Center)

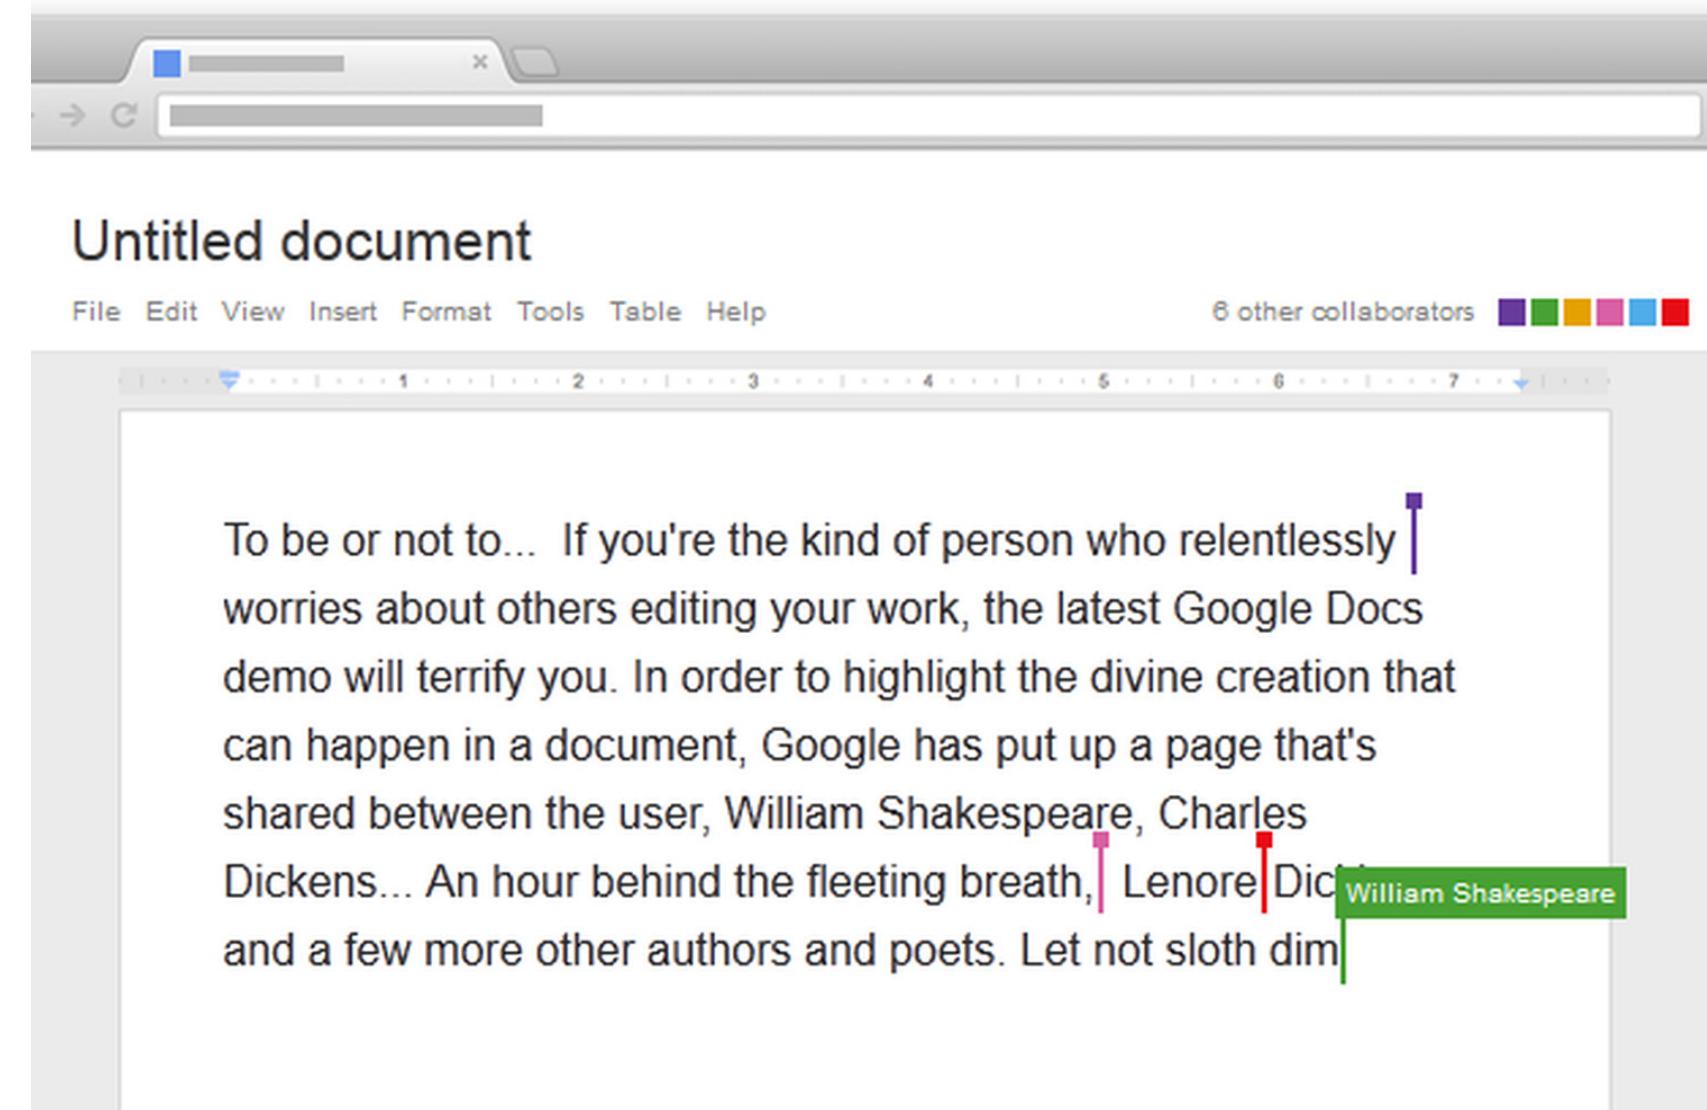

⁴ Andro, 2018, Digital libraries and crowdsourcing

Remote interactions⁵

Right: collaborative authoring in Google Docs

Next slide: different forms of videoconferencing

Continuous task⁶

Right: persistent project management displays

⁶[YouTube](#)

Communication + coordination⁷

Right: project management software tools

The screenshot shows a project management interface titled "Sprint Plans". The top navigation bar includes "Overview", "List", "Board" (which is selected), "Timeline", "Calendar", "Dashboard", "Messages", and "More...". A search bar and user profile icons are also present. Below the navigation, a message states "Last task completed on Sep 30". The main area features a Kanban board with four columns: "Backlog", "Ready", "In Progress", and "Done".

- Backlog:** Contains tasks like "Design navigation changes" (Design, Jan 10, 4 comments), "Performance improvements" (Engineering, 3 comments, 2 attachments), and "Implement new designs" (Engineering, 1 comment, 5 attachments).
- Ready:** Contains tasks like "Design prototype" (Design, Jan 16, 1 comment, 2 attachments), "Design review", "Testing plan", and an option to "+ Add subtask".
- In Progress:** Contains tasks like "Build social sharing functionality" (Engineering, Friday, 4 comments), "Redesign overview" (Design, Nov 15, 5 comments, 1 attachment), and "Introduce new navigation" (Data Science, Sep 23, 2 comments, 5 attachments). A large image of a snowy mountain peak is displayed in the background of this column.
- Done:** Contains tasks like "Usability testing" (Research, Sep 30, 4 comments).

What is crowdsourcing? How is it related to CSCW?

Advances in technology—including communication, computing, and transportation—have fundamentally changed organizations.

Yesterday's organization:

- » persistent
- » collocated
- » physically connected

Today's & tomorrow's organization:

- » ad-hoc
- » distributed
- » digitally connected

What is virtual distance?

Definition: The perceived distance between two or more individuals or groups, caused by the persistent and pervasive use of technology-mediated work and communications.¹

Three types of distance:

1. **Physical:** geographical, temporal, organizational
2. **Operational:** team size, meeting frequency, tech-savviness
3. **Affinity:** values, communication style, trust, interdependency

Technical and organizational innovation aims to close these distances.

¹Lojeski (2009). Leading the virtual workforce: How great leaders transform organizations in the 21st century.

*What is **crowdsourcing**?*

Definition: Crowdsourcing is a sourcing model in which individuals or organizations obtain goods and services, including ideas and finances, from a large, relatively open and often rapidly-evolving group of internet users; it divides work between participants to achieve a cumulative result.²

²[Wikipedia](#)

CROWDSOURCING

**NBC NEWS
LEARN**

What are characteristics of crowdsourcing?

- » Other people doing work for you
- » Work is structured to facilitate efficiency and reaching expertise
 - » Tasks can be outsourced at any scale—“microtasks”
 - » Workers can be found instantaneously, e.g., within seconds
 - » Access to worker quality and expertise

Where does crowdsourcing come from?

Milestone 1. 13th century, Hugh of Saint-Cher, O.P., coordinated monks to index scripture.

Milestone 2. Longitude act of 1714 offered prize money to anyone who could determine the longitude of a ship to avoid accidents, followed by several examples of reward-based crowdwork.

Milestone 3. In 1794, Gaspard de Prony devised microtasks of addition and subtraction for 80 unemployed heirdressers to develop logarithmic and trigonometric tables.⁴

⁴ Andro, 2018, Digital libraries and crowdsourcing

How is crowdsourcing different from contract work?

Similar, but different:

- » Contracting is handled by a 3rd party
- » Contracting, tasking, and work happens instantaneously
- » More competitive, lower-cost, instantaneous

Example Markets

Design, product development, datawork, reputation management, errands

» Online

» Design — 99 Designs

» Datawork — Amazon's Mechanical Turk; CrowdFlower

» Reputation — Fiverr

» Local

» Errands — TaskRabbit, Taskr

» Taxi — Uber, Lyft

» Flash Teams

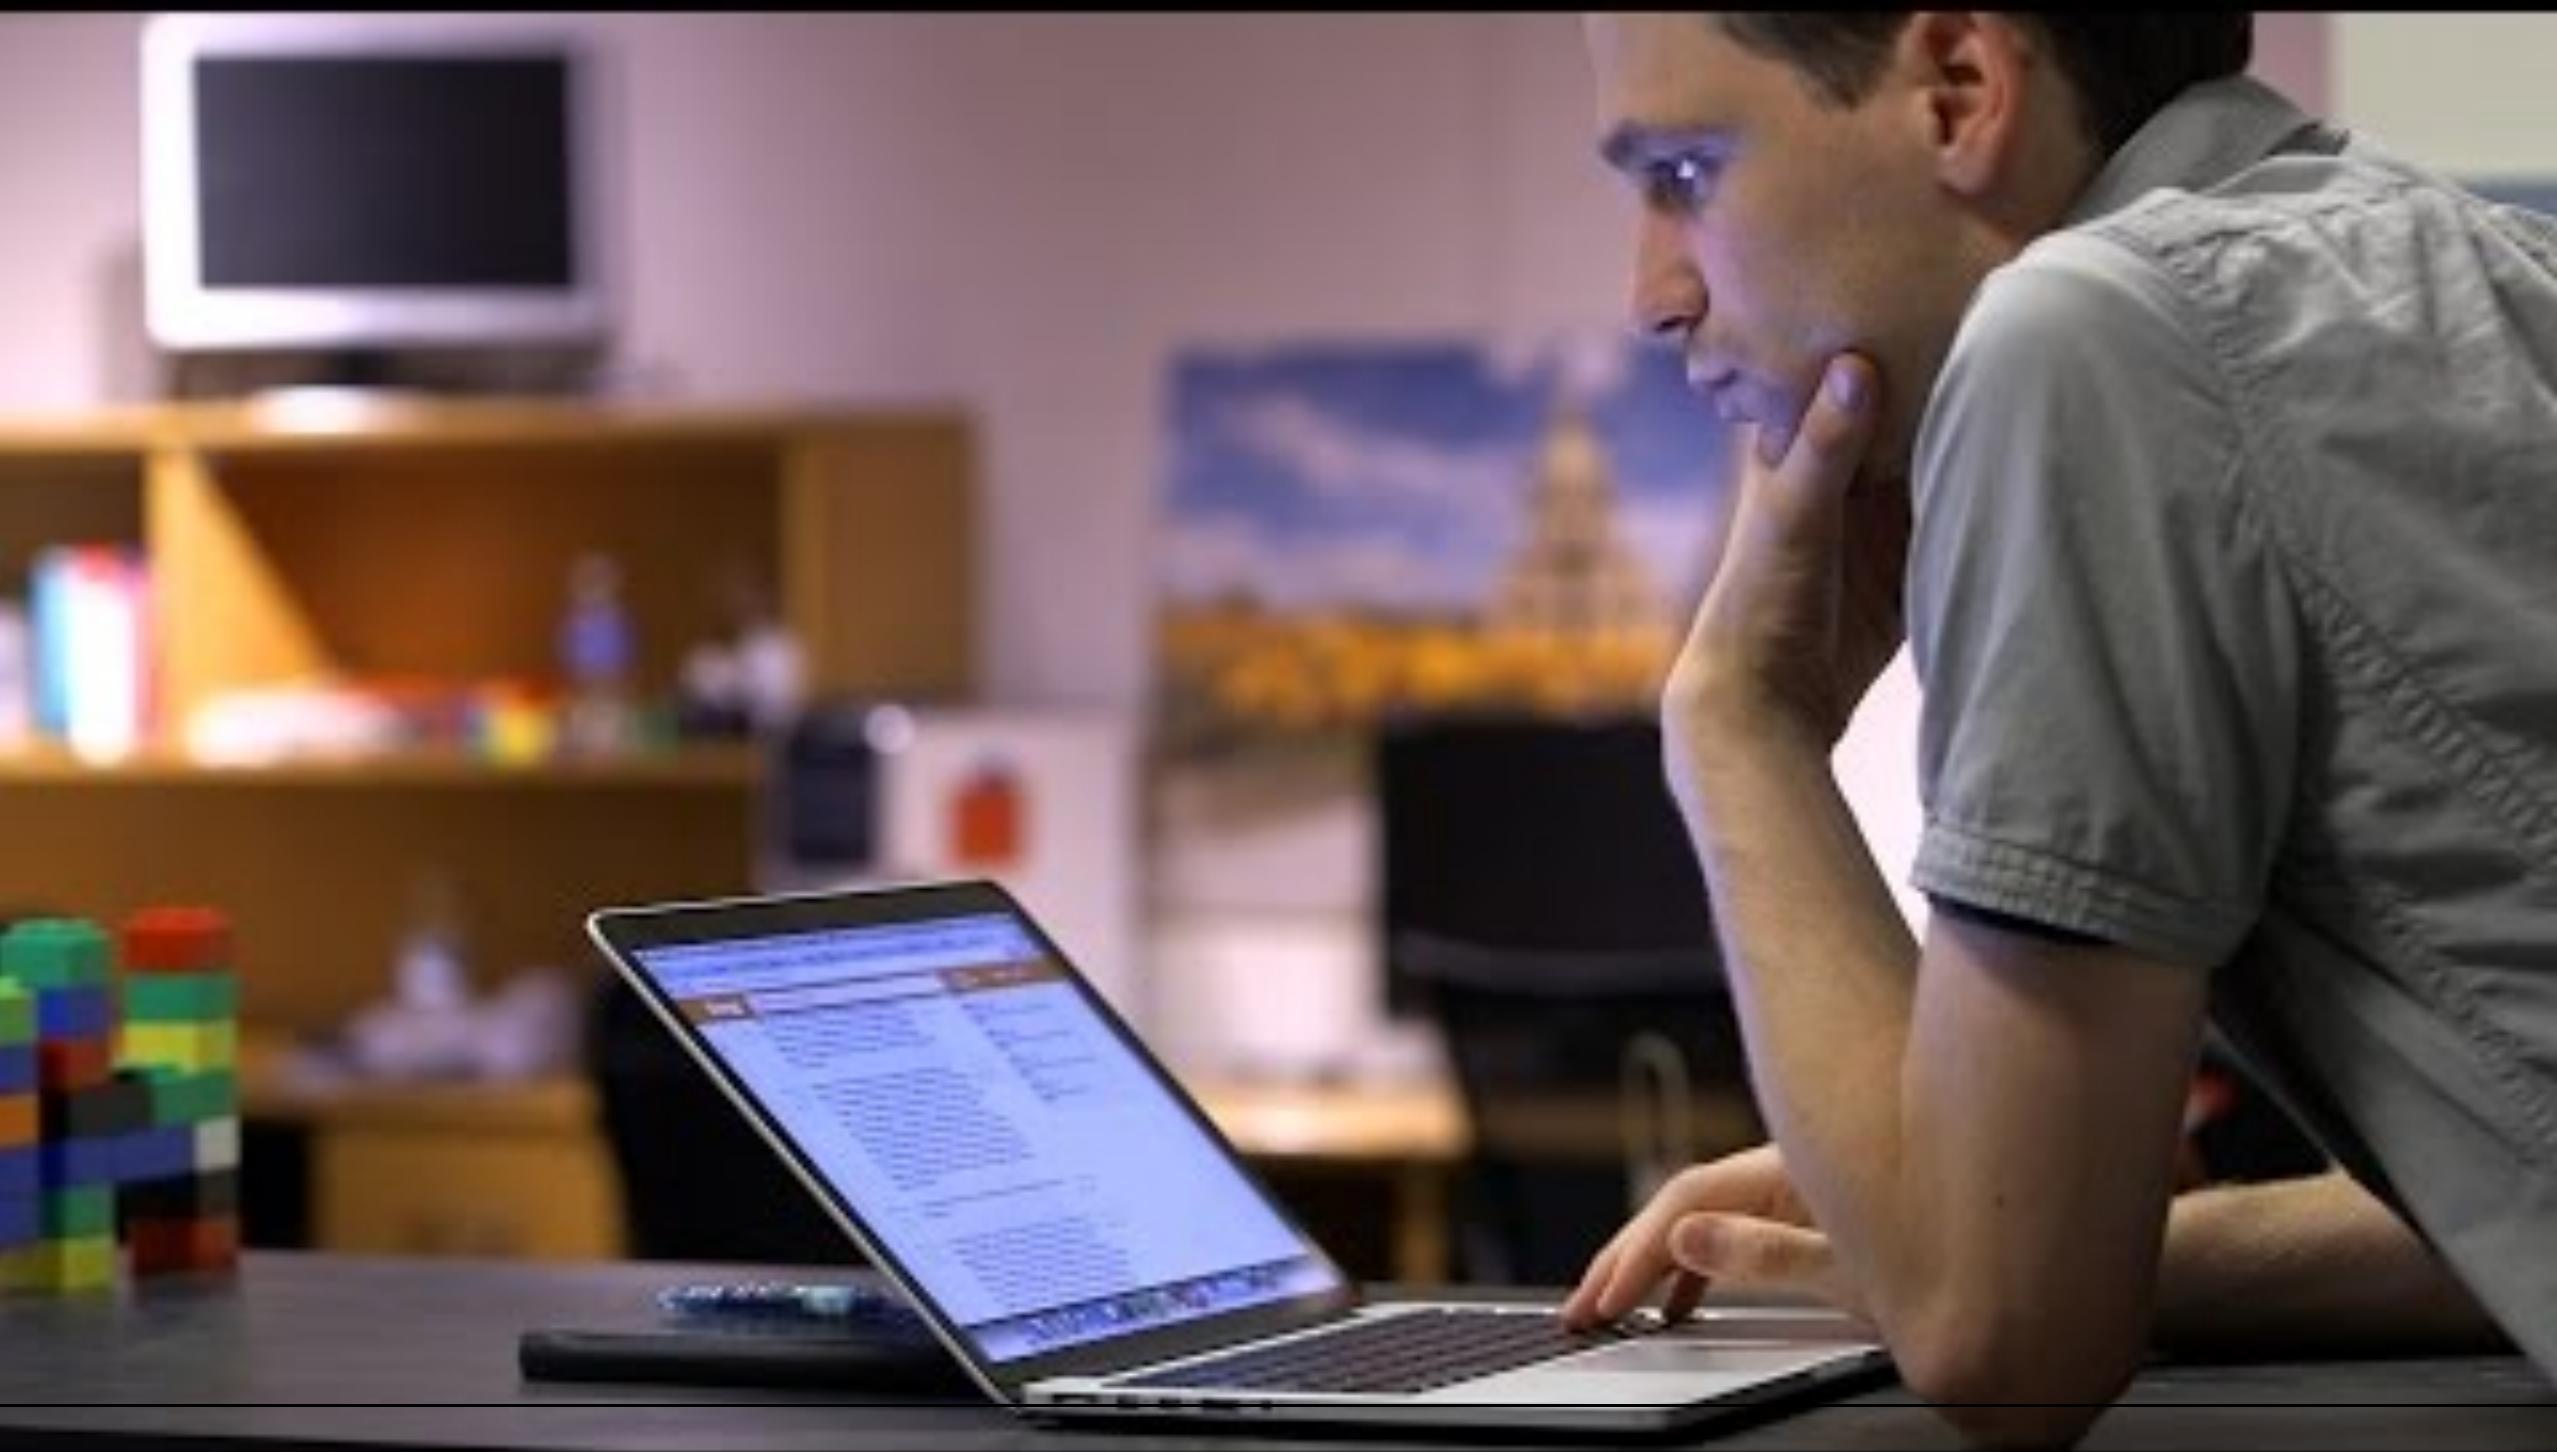

How 99designs works

Where is crowdsourcing going?

Scaffold organizations that bring experts together to explore product/service ideas — "flash teams," "flash organizations"

- » Scalable with new skillsets, workload
- » Examples: Quirky, OpenIdeo, Innocentive

This all sounds great. Should I quit grad school and start crowd work?

Not so fast. Work in the "gig economy" has many potential drawbacks for workers:

- » Lack of labor law protections, employment benefits⁸
- » Low pay, social isolation, low work quality, exhaustion⁹

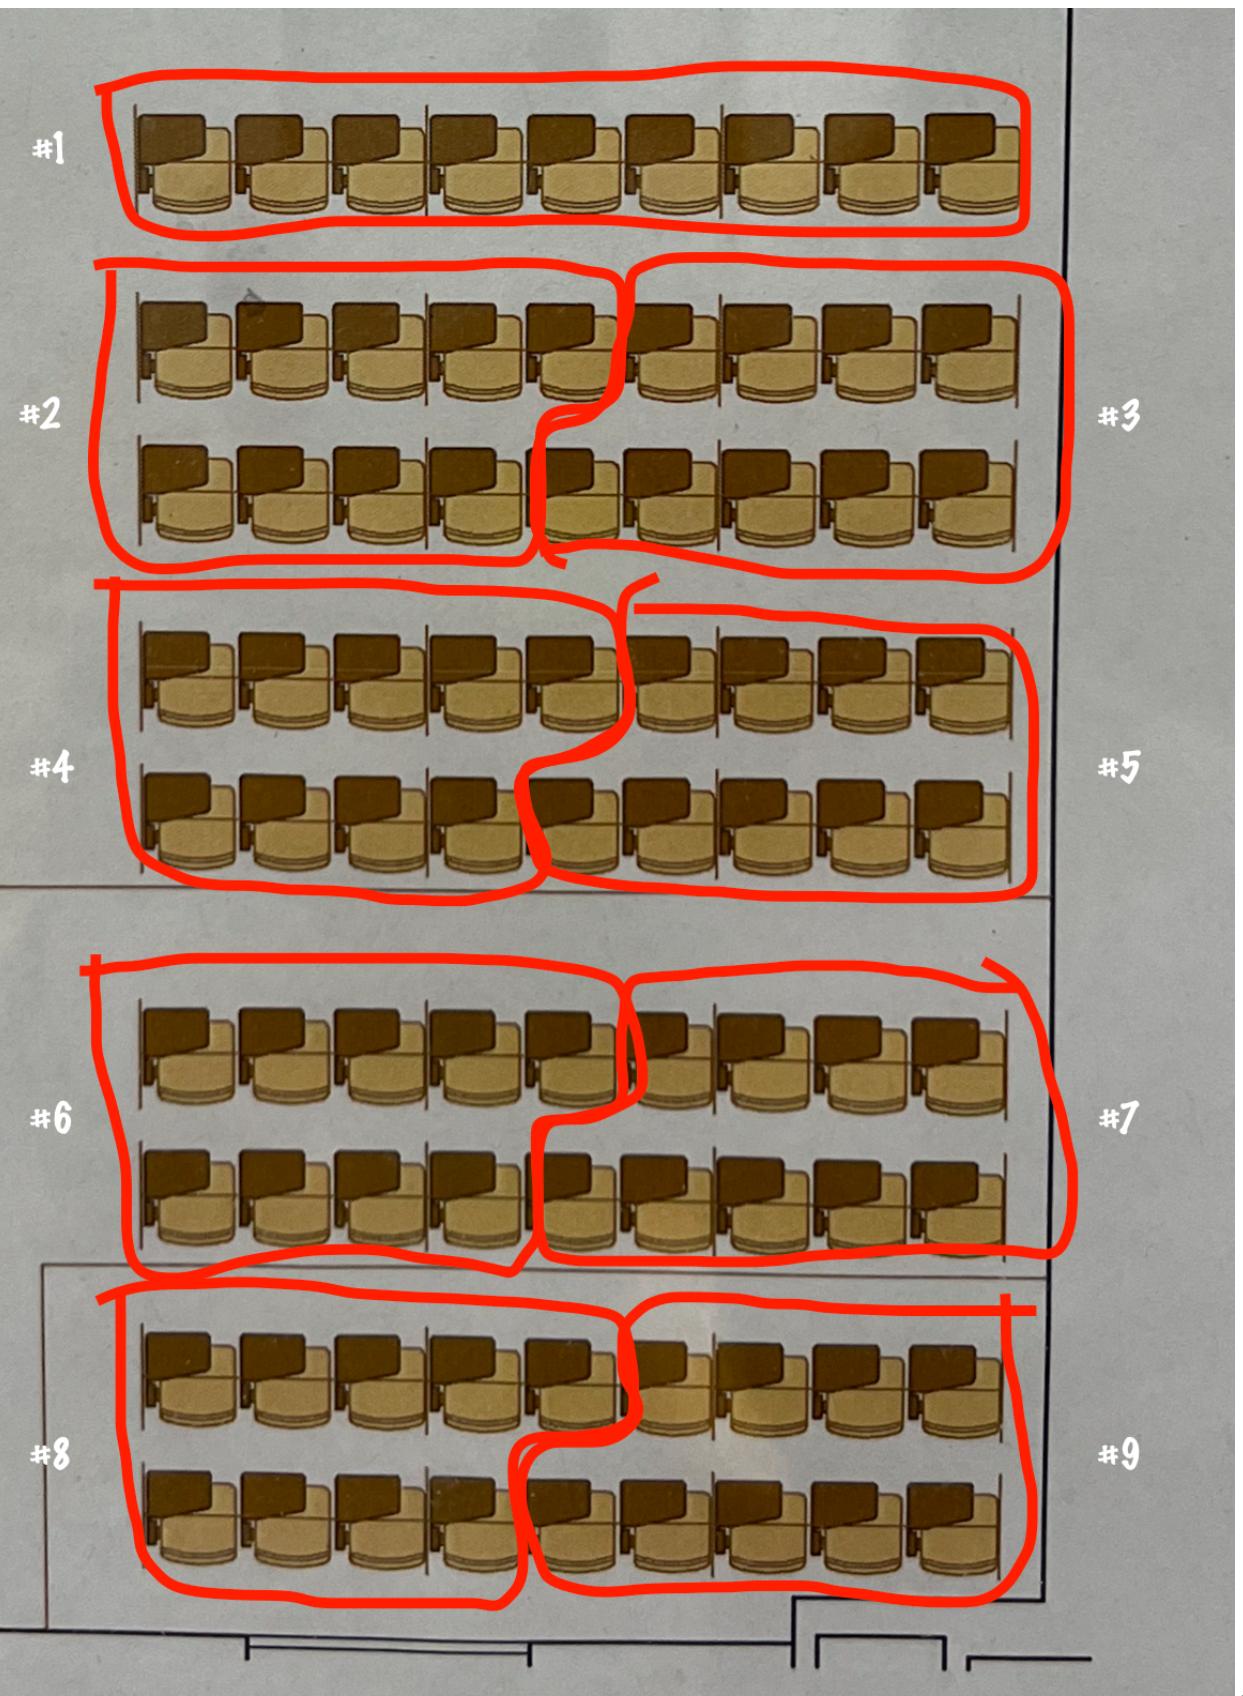

Overall, this is a rapidly changing area with technological, societal, legal, and ethical facets.

⁸Donovan et al. (2016). [What does the gig economy mean for workers?](#)

⁹Tan et al. (2021). [The ethical debate about the gig economy: A review and critical analysis.](#)

Discussion Format

- » Group discussion ~15 minutes
 - » Separate to 9 groups randomly
 - » Discuss with your group members
 - » Take notes in the shared doc – pick your group number
- » Summary from each group & discussion ~10 minutes

Discussion Questions

- » What are some of the groupware systems are we using for this class? How would you categorize them?
- » What are examples of the challenges that Grudin highlighted you see in today's groupware?
- » What principles do you see carried over to non-work contexts?
- » What relevant external resources have you found?
- » How is crowdsourcing different from CSCW?
- » What are examples you have found?
- » What do you think are technological implications?
- » What do you think are organizational implications?
- » What do you think are societal implications?
